VSHARK SOLUTIONS PVT LTD

VERTEX 3D SCANNERS · NOW FROM VSHARK

Professional 3D scanners. Backed by scanning engineers.

Vertex blue-laser and optical-tracking scanners — sold, set up and supported by the VShark team that scans and models parts for clients every day.

VERTEX3D PRO

0.020 mm	7.1 M	0.01 mm	8 m
HIGHEST PRECISION	MEASUREMENTS PER SECOND	MAX. RESOLUTION	LARGEST OBJECT (TRACKER)

01 Choose your scanner

Three models, one family — all Class II eye-safe blue laser.

01

Vertex3D

Handheld blue-laser 3D scanner

A fast, lightweight handheld scanner with 26 crossed blue laser lines for everyday industrial scanning.

0.020 mm precision

Laser lines	26 crossed blue laser lines
Speed	5,400,000 measurements/s
Scan field	650 × 550 mm
Sample size	> 10 mm

02

Vertex3D Pro

Handheld blue-laser 3D scanner

50 crossed blue laser lines and 7.1 million measurements per second for large parts and demanding production work.

0.020 mm precision

Laser lines	50 crossed blue laser lines
Speed	7,100,000 measurements/s
Scan field	650 × 550 mm
Sample size	> 10 mm

03

Vertex Tracker

Optical-tracking 3D scanning system

Optical tracking with a 1100 × 800 mm field for large objects up to 8 m — no markers on the part.

0.025 mm precision

Laser lines	50 crossed blue laser lines
Speed	7,100,000 measurements/s
Scan field	1100 × 800 mm
Sample size	10 mm – 8000 mm

02 Three scan modes in every model

MODE 01

High-speed

26 or 50 crossed blue laser lines

Captures large surfaces fast.

MODE 02

Precision

7 parallel blue laser lines

For fine features and sharp edges.

MODE 03

Deep-hole

1 single blue laser line

Reaches into holes and deep cavities.

03 Why buy from VShark

01

Sold by scanning engineers

We scan and model parts for clients every day — we know the whole workflow, not just the hardware.

02

Live demo on your parts

Send us your parts and use case; we recommend the right model and show it working.

03

Set-up & training

We install the scanner and software and train your team to get clean data fast.

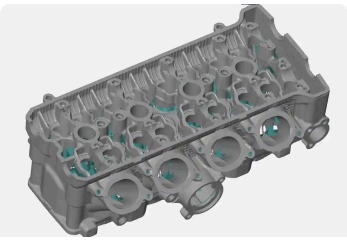

04

Support in India & UAE

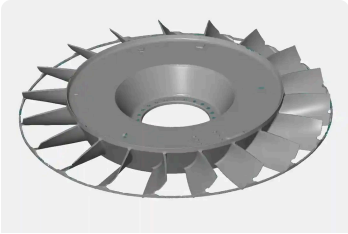

Local help by phone and WhatsApp — plus our service team for overflow work.

04 What you can capture

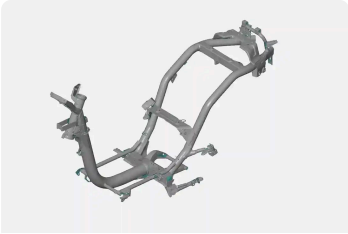

Scan data from parts captured by the VShark team.

Cylinder Head

Impeller

Bike Frame

Bumper

Reverse engineering
Scan legacy parts and rebuild them as CAD.

Quality inspection
Compare production parts with CAD in colour maps.

Product design
Capture prototypes, clay models and existing parts.

Digital archiving
Record moulds, tools and heritage objects.

05 Specifications

Compare side by side.

SPECIFICATION	VERTEX3D	VERTEX3D PRO	VERTEX TRACKER
High-speed scanning	26 crossed blue laser lines	50 crossed blue laser lines	50 crossed blue laser lines
Precision scanning	7 blue laser lines	7 blue laser lines	7 blue laser lines
Deep-hole scanning	1 single blue laser line	1 single blue laser line	1 single blue laser line
Highest precision	0.020 mm	0.020 mm	0.025 mm
Max. scanning speed	5,400,000 measurements/s	7,100,000 measurements/s	7,100,000 measurements/s
Max. scanning field	650 × 550 mm	650 × 550 mm	1100 × 800 mm
Max. resolution	0.01 mm	0.01 mm	0.01 mm
Volume accuracy	0.015 mm + 0.035 mm/m	0.015 mm + 0.035 mm/m	10.0 m³: 0.060 mm · 25.0 m³: 0.083 mm
Volume accuracy (photogrammetry)	0.015 mm + 0.025 mm/m	0.015 mm + 0.025 mm/m	0.044 mm + 0.012 mm/m
Reference distance	300 mm (200 mm fine mode)	300 mm (200 mm fine mode)	300 mm
Recommended sample size	> 10 mm	> 10 mm	10 mm – 8000 mm
Depth of field	550 mm	550 mm	400 mm (scanner only)
Laser class	Class II (eye safe)	Class II (eye safe)	Class II (eye safe)
Output formats	.STL, .PLY, .ASC, .TXT	.STL, .PLY, .ASC, .TXT	.STL, .PLY, .ASC, .TXT
Interface	USB 3.0	USB 3.0	USB 3.0
Operating temperature	-10 °C to 40 °C	-10 °C to 40 °C	-10 °C to 40 °C

Recommended computer: Windows 10 or later (64-bit) · NVIDIA GTX/RTX GPU (e.g. RTX 4060 or higher), 8 GB+ VRAM · Intel Core i7-13700H or better · 32 GB RAM or more. Specifications from the manufacturer and subject to change.

06 Need it scanned instead?

Our service team handles one-off jobs and overflow work — from a single scan to finished CAD, inspection reports and prints.

Capture → Process → Engineer → Deliver

- 01 3D Scanning
- 02 Reverse Engineering
- 03 Scan to BIM
- 04 Class A Surfacing
- 05 Digital Metrology
- 06 3D Printing
- 07 Product Rendering

VSHARK SOLUTIONS PVT LTD

Book a live demo.

Send us your parts and use case — we'll recommend a model, show it scanning and send a quote.
